MOLLE AD ARIA

CATALOGO 2019

Springhel®

tecnologia applicata al movimento

MADE IN EU

Springhel®

SPRINGHEL

LA NUOVA GAMMA DI MOLLE AD ARIA PRODOTTA IN EUROPA NELL'AMBITO CEE CON I PIÙ ELEVATI E SICURI STANDARD DI QUALITÀ

LA GAMMA SPRINGHEL COMPRENDE

- **MOLLE AD ARIA COMPLETE A TENUTA MECCANICA E SELF-SEALING**
- **MOLLE AD ARIA SEMICOMPLETE**
- **MEMBRANE DI RICAMBIO CONICHE E CILINDRICHE**
- **MOLLE AD ARIA A BALZE**

SICUREZZA

Le molle SPRINGHEL® sono realizzate con materiali rigorosamente selezionati per la loro resistenza e affidabilità nelle più severe condizioni d'impiego. Con i tessuti utilizzati, vengono abitualmente confezionati anche i pneumatici per uso veicolistico.

TECNOLOGIA

Le molle SPRINGHEL® vengono prodotte con le più moderne apparecchiature che consentono la realizzazione e il controllo di un prodotto che risulti tecnologicamente perfetto.

AFFIDABILITÀ

Le molle SPRINGHEL® sono in grado di superare i più severi test dei maggiori costruttori di veicoli. Il processo di produzione è certificato ISO 9001 da prestigiosi istituti europei specialisti nel settore.

COME IMMAGAZZINARE LE MOLLE AD ARIA

La presenza di fattori ambientali quali ozono, luce, calore o umidità, può causare un deterioramento esteriore della molla ad aria e una diminuzione delle sue prestazioni.
Per prolungare la vita delle molle ad aria si consiglia pertanto di seguire le seguenti indicazioni di stoccaggio:

- > Conservarle negli imballi originali e comunque in luoghi con una temperatura inferiore a 25°C, in assenza di umidità;
- > Tenerle lontane da fonti di calore e da ozono;
- > Non immagazzinarle deformate.

PRECAUZIONI D'USO

È necessario mantenere gonfie le molle ad aria quando il mezzo sul quale sono montate staziona in luogo aperto per un tempo prolungato. Questo consente di evitare il formarsi di pieghe che possono rendere la membrana più sensibile agli agenti atmosferici.
Inoltre, il grasso utilizzato su altri componenti del veicolo può ridurre la durata delle molle ad aria.
Ad esempio, il grasso utilizzato su un giunto universale può nella rotazione colare sulle molle ad aria.
Occorre pertanto seguire alcune norme di buon utilizzo:

- > Non utilizzare grasso eccessivo per lubrificare i componenti del veicolo;
- > Controllare periodicamente lo stato delle molle ad aria;
- > Fare uscire ogni tanto tutta l'acqua dall'impianto di aria compressa se non provvisto di essiccatore;
- > Controllare accumuli di sporco su pistone, piastra superiore e anelli metallici della cintura;
- > Per pulire utilizzare solo acqua e sapone;
- > Non immagazzinarle deformate.

INSTALLAZIONE DELLE MOLLE AD ARIA

QUANDO È OPPORTUNO SOSTITUIRE LA MEMBRANA:

È sempre necessario sostituire la membrana in caso di perdite d'aria.
Qualora lo strato di copertura in gomma sia usurato al punto tale da evidenziare le tele sottostanti, anche se non ci sono perdite evidenti, è opportuno effetturare ugualmente la sostituizione.

COME SMONTARE LA MEMBRANA:

1. Portare la membrana alla massima estensione alzando il veicolo fino alla posizione più alta, se provvisto di terzo asse eseguire l'operazione con l'asse a terra;
2. Far uscire totalmente l'aria dalla molla;
3. Inserire una leva che non abbia estremità taglienti fra la membrana e il piatto metallico superiore;
4. Sfilare la membrana da un lato;
5. Effettuare la stessa operazione di cui al punto 3 per sfilare la parte inferiore.

COME MONTARE LA NUOVA MEMBRANA:

1. Per un corretto e semplice assemblaggio, assicurarsi che la sede della piastra e del pistone della molla ad aria siano puliti (in caso di necessità utilizzare un poco d'acqua);
2. Verificare sempre che nelle parti metalliche a contatto con la membrana non ci siano né sbavature di metallo né corrosioni che possano danneggiarle;
3. Premere la membrana come da figura;
4. Inserire la membrana fra piastra superiore e pistone;
5. Incastrare il tallone superiore e quello inferiore della membrana alla piastra superiore e al pistone;
6. Gonfiare la membrana fino ad ottenere un perfetto accoppiamento fra la gomma ed il metallo. La conferma di un corretto montaggio si percepisce udendo un rumore secco che corrisponde al superamento del "dentino" di ritegno, quando presente;
7. Abbassare il veicolo finché la membrana non si sarà avvolta sul pistone.

MANAGEMENT SYSTEM CERTIFICATE

Certificato no./Certificate No.:
CERT-05480-99-AQ-BOL-SINCERT

Data prima emissione/Initial date:
28 dicembre 1999

Validità:/Valid:
26 novembre 2017 - 25 novembre 2020

Si certifica che il sistema di gestione di/This is to certify that the management system of

SOCIETA' BRIGHEL S.r.l.

Sede Legale: Via Dozza, 21/29 - 40069 Zola Predosa (BO) - Italy

È conforme ai requisiti della norma per il Sistema di Gestione Qualità/
has been found to conform to the Quality Management System standard:

UNI EN ISO 9001:2015 (ISO 9001:2015)

Questa certificazione è valida
per il seguente campo applicativo:

Progettazione e gestione della produzione di molle ad aria e di articoli tecnici in gomma e gomma-metallo per applicazioni industriali e ferrotranviarie. Commercializzazione di articoli tecnici e industriali in gomma e gomma-metallo. Servizi di assistenza presso il cliente

(Settore EA: 14 - 17 - 29 - 22)

This certificate is valid
for the following scope:

Design and Production management of air springs and technical rubber and metal-rubber articles for industrial, railway and tramway applications. Trade of technical and industrial rubber and metal-rubber articles. Provision of customer services

(EA Sector: 14 - 17 - 19 - 22)

Luogo e Data/Place and date:
Vimercate (MB), 14 novembre 2017
