LINEA ROBOTIZZATA PER L'ASSEMBLAGGIO ED IL CONTROLLO QUALITA' DEI MOZZI RUOTA COMPLETI DI CUSCINETTI E RUOTE FONICHE

Questa linea robotizzata è stata studiata e realizzata per assemblare i mozzi ruota con i relativi componenti in automatico tramite robot e presse di piantaggio.

Il robot con portata al polso di 350 kg gestisce la movimentazione dei mozzi ruota mentre il secondo robot gestisce la movimentazione di tutti i relativi componenti.

Tutta la linea robotizzata opera in completa autonomia tramite uno specifico software dedicato che comunica tutte le informazioni che necessitano (forze e quote di piantaggio). A montaggio completato, il mozzo viene trasferito sull'unità di collaudo che va a verificare la coppia di rotolamento del mozzo per validarne il prodotto.

Tale controllo qualità avviene al 100% dei mozzi assemblati. A qualità conforme il mozzo ruota viene poi marchiato per garantire la tracciabilità del prodotto stesso.

ROBOTIC LINE TO ASSEMBLE AND QUALITY TEST THE WHEEL HUBS WITH BEARING AND ABS RING

This robotic line has been studied and realized to automatically assemble wheel hubs with relative components by means of robot and pressing presses.

The robot, with flow-rate strength 350 kg, manages the wheel hub movements while the second robot is dedicated to all the components movements.

The whole robotic line operates in complete autonomy by means of a specific dedicated software that communicates all the necessary information (power and pressing quota). When assembly is achieved, the hub is transferred to the test unit where the hub rolling torques is checked to validate the product.

This quality test is done on all the assembled hubs (100%)

The compliant hubs are marked in order to guarantee their traceability.

LIGNE ROBOTISEE POUR L'ASSEMBLAGE ET LE CONTROLE QUALITE DES MOYEURS DE ROUE COMPLETS DE ROULEMENT ET ABS

Cette ligne robotisée a été étudiée et réalisée pour assembler automatiquement les moyeux de roue avec les différents composants par le biais de robot et de presses d'emboutissage.

Le robot, avec force de portée de 350 kg, gère le déplacement des moyeux de roue tandis que le second robot gère le déplacement de tous les composants pertinents.

Toute la ligne robotisée fonctionne en parfaite autonomie grâce à un logiciel spécifique et dédié qui communique toutes les informations nécessaires (force et quota de pressage). A' montage fait, le moyeu est transféré sur l'unité de contrôle qui vérifie les couples de frottement afin de valider le produit.

Ce contrôle est fait sur tous les moyeux assemblés (à 100%).

Le moyeu confirmé est marqué afin d'assurer que le produit soit traçable.

ROBOTISIERTE LINIE FÜR DIE MONTAGE UND QUALITÄTSKONTROLLE VON RADNABEN MIT LAGERN UND ABS

Diese robotisierte Linie wurde, um die Radnaben mit ihren Komponenten automatisch durch Robot und Pressen zu montieren, entwickelt und realisiert. Der Robot hat eine Tragfähigkeit von 350 kg, und er übernimmt die Bewegung der Radnaben, während der zweite Robot die Bewegung aller zugehörigen Komponenten übernimmt. Die gesamte robotisierte Linie arbeitet in völliger Autonomie durch eine spezielle Software, die alle notwendigen Informationen, die sie benötigen (Kräfte und Montage Maße), enthält und kommuniziert. Nach Abschluss der Montage wird die Radnabe auf die Prüfeinheit übertragen, die das Rollmoment der Radnabe zur Validierung des Produkts überprüft.

Diese Qualitätskontrolle erfolgt zu 100% der montierten Radnaben.

Wenn die Qualität konform ist, wird die Radnabe markiert, um die Rückverfolgbarkeit des Produktes selbst zu gewährleisten.

LÍNEA ROBOTIZADA PARA EL MONTAJE Y EL CONTROL DE CALIDAD DE LOS CUBOS DE RUEDA COMPLETOS CON RODAMIENTOS Y ABS RING

Esta línea robotizada ha sido diseñada y construida para ensamblar automáticamente los cubos de ruedas con los componentes relacionados mediante robots y prensas eléctricas. El primer robot, con capacidad al pulso de 350 kg., gestiona el movimiento de los cubos de ruedas, mientras que el segundo robot controla el movimiento de todos los componentes relacionados. Toda la línea robotizada funciona con total autonomía a través de un software específico dedicado que comunica toda la información que necesita (fuerzas impulsoras y cuotas). Una vez que se completa el ensamblaje, el cubo se transfiere a la unidad de prueba, que verifica los giros del cubo para validar el producto.

Este control de calidad se realiza al 100% de los cubos de rueda ensamblados.

En cumplimiento a los más estrictos estándares de calidad establecidos, el cubo de rueda se marca para garantizar la trazabilidad del producto en sí.

РОБОТИЗОВАННА ЛІНІЯ ПО СБОРКІ І КОНТРОЛЮ ЯКІСТВА КОЛІСНИХ СТУПІЦ В КОМПЛЕКТІ С ПДШИПНИКАМИ І КОЛЕСОМ ABS

Настоящая линия была разработана для автоматической сборки колёсных ступиц с соответствующими компонентами с использованием робота и запрессовочного оборудования. Один робот с пульсовой мощностью 350 кг управляет движением колёсных ступиц, другой робот управляет движением всех комплектующих деталей. Вся роботизированная линия функционирует в полной автономии посредством специальной программы, предназначенной для передачи всей необходимой информации (сила и параметры запрессовки). После завершения монтажа ступица перемещается в сектор проверки качества, где проверяются технические характеристики ступицы на соответствие установленным требованиям. Данный контроль качества проходят 100% собранных ступиц. Качество колёсной ступицы затем подтверждается соответствующей маркировкой.

IL NOSTRO CONTROLLO QUALITA'

L'**innovazione tecnologica**, finalizzata al miglioramento continuo della **qualità** del prodotto e del servizio, rappresenta da sempre il tratto distintivo di **EMMERRE**.

I continui investimenti in **apparecchiature di ultima generazione** consentono di sviluppare e realizzare **prodotti innovativi** per soddisfare ogni esigenza del mercato. Molti prodotti sviluppati da **EMMERRE** sono coperti e tutelati da **BREVETTI nazionali ed internazionali**.

Dal 2016 il laboratorio di ricerca e sviluppo di **EMMERRE** è stato dotato della tecnologia avanzata della **scansione laser 3D**. Tramite la tecnologia della scansione laser 3D è possibile **ingegnerizzare** prodotti da "campione" adottando, nel contempo, soluzioni tecniche innovative atte a migliorarne le caratteristiche. La tecnologia della **scansione laser 3D** consente inoltre di eseguire tutte le attività necessarie a **garantire la qualità del prodotto**: ispezioni, analisi dimensionali, verifiche di conformità, analisi dei guasti, ecc.

OUR QUALITY CONTROL

The **technological Innovation** aimed to the continuous improvement of products and service **quality** is **EMMERRE** hallmark.

The continuous investments in **equipment of last generation** allow to develop and manufacture **innovative products** that answers the market requirements. Most of the parts that **EMMERRE** develops are protected by **national and international PATENTS**.

Since 2016 **EMMERRE** Research and Development laboratory has been equipped with a **3D laser scanner**. The 3D laser scanner allows the reverse **engineering** starting from a sample adopting new technical solutions to improve the parts characteristics. In addition the **3D scanner** technology allows to perform all the activities that **guarantee the product quality**: inspections, measurements, conformity, claim analysis and so on.

КОНТРОЛЬ КАЧЕСТВА

Техническая инновация, применяемая для постоянного улучшения качества продукции и сервисного обслуживания, как всегда представляет бренд **EMMERRE**.

Постоянные инвестиции в современное оборудование позволяют создавать и реализовывать новую продукцию, отвечающую требованиям рынка. Многие продукты, реализованные **EMMERRE**, имеют **ПАТЕНТЫ**, национального и международного уровня.

Начиная с 2016 года, отдел развития **EMMERRE** оснащен оборудованием высокой технологии - лазерное сканирование 3D. Благодаря технологии лазерного сканирования 3D возможно проектировать детали из «образцов», дополняя более современными техническими характеристиками. Технология лазерного сканирования 3D позволяет полностью гарантировать качество продукции: геометрическая проверка, контроль на соответствие размерам, поиск дефектов.

DICHIARAZIONE DI ASSICURAZIONE RESPONSABILITA' CIVILE PRODOTTI

Si dichiara che la SpA **EMMERRE SRL**, con sede legale in 10036 SETTIMO TORNESE (TO) - V. L. Raspi, 2 P.Iva n. 02110740012 ha stipulato presso la nostra Compagnia una polizza di assicurazione per la Responsabilità Civile Prodotti, il cui premio è stato regolarmente corrisposto e la cui garanzia assicurativa bene indicata nel Contratto, di quanto questi sia tenuto a pagare quale civilmente responsabile ai sensi di legge per danni cagionati a terzi da difetti dei prodotti per i quali riveste, in Italia, la qualifica di produttore. E' compresa quindi anche la R.C. derivanti ai sensi del D.P.R. 224/1988 e del D. Lgs. 25/2001.

NUMERO DI POLIZZA: 2018032320152 RC PRODOTTI
MAGGIORI: Per Sinistri, Anno assicurativo e Sinistri in serie: € 10.000.000.000

VALIDITA' DELLA GARANZIA: Per i prodotti consegnati nei territori di qualsiasi Paese, esclusi U.S.A., Canada e Messico, l'assicurazione vale per le richieste di risarcimento presentate al Contratto per la prima volta durante il periodo di efficacia dell'assicurazione stessa. Sono comunque risarcibili i danni ovunque verificatisi (compresi U.S.A., Canada e Messico).

It is hereby declared that **EMMERRE SRL** with registered office in 10036 SETTIMO TORNESE 10036 (TO) - V. L. Raspi, 2 P.Iva n. 02110740012 has stipulated with our Company an insurance policy for the Civil Liability for Products, whose premium has been duly paid and whose insurance guarantee holds the Contractor harmless, of how much he is required to pay as civilly liable under the law for damages caused to third parties by defect of the products for which he holds, in Italy, the title of producer. Therefore, this also includes the civil liability deriving from it pursuant to Presidential Decree 224/1988 and Legislative Decree 25/2001.

POLICY NUMBER: 2018032320152 RC PRODUCTS

MAXIMUM: For Claims, Insurance Year and Series Claims € 10,000,000,000

WARRANTY VALIDITY: For products delivered to the territories of any country, excluding the U.S., Canada and Mexico, the insurance applies to claims submitted to the Contractor for the first time during the period of effectiveness of the insurance itself. However, damages wherever they occur (including in the U.S.A., Canada and Mexico) are eligible for compensation.
